

# INAUGURAL RAM SALE

Flock No. 4412

Flock No. 56

**SATURDAY, 10th OCTOBER, 2009**

**Inspection at 10.30am**  
**Sale commences 1pm**  
at "Chrome", Dartmoor/Digby Road, Hamilton, Vic  
(Refer to Map on back cover)

Sale offering, in order as follows;

**60 Poll Dorsets**

**100 Maternal Composites**

**40 Coopworths**

*Individual purchasers receive every 6th ram free (based on av price).*

**Vendor:**

**Matt Tonissen**  
0417 149 805

**Agent:**

**Robert Claffey**  
0418 625 839

[www.coopworth.org.au/chrome](http://www.coopworth.org.au/chrome) [www.polldorset.org.au/icon](http://www.polldorset.org.au/icon)

## **LUNCHEON**

Will be provided at the sale.

## **INSURANCE**

Insurance cover will be available on the day.

## **REBATE**

5% rebate to outside agents introducing new clients in writing prior to sale.

## **LAMBPLAN**

ASBV's have been generated from the 15/09/09 Terminal and 15/09/09 Coopworth data sets.

## **HEALTH**

OJD vaccinated 4 ABC points

Brucellosis Accredited Free

Rams have full 5 in 1 Vaccination histories

Lambplan Performance Recorded

Rams have been treated with ZAPP at shearing. Shearing Date 25th Aug 09

Please note that a cross border agreement exists for sheep purchased from Southern Grampians Shire and entering SA flocks.

Our rams with 4 ABC points are free to enter SA flocks

Health statements will be available on the day of sale.

## **SELLING METHOD**

Rams will be sold by auction in pens of three under the three hammer system.

## **EVERY 6<sup>th</sup> RAM FREE**

For every multiple of 6 rams purchased, one ram will be given in at no charge, based on the average price of your purchase. The special offer will apply to your Maternal purchases and Poll Dorset purchases separately.

This concept has been introduced to reward volume buyers for their support.

Example: A purchaser buys;

3 rams at \$600 =	\$1,800
3 rams at \$800 =	\$2,400
SUB TOTAL	\$4,200 (av. Price \$700)
Less one ram at n/c	- \$700
TOTAL	= \$3,500 (av. Price \$583)

Please bring this catalogue to the Sale to ensure that you have one.

## **FREE DELIVERY**

Free delivery is available for sale rams to nominated destinations.

## **RAM SELECTION ASSISTANCE**

If anyone needs any assistance with ram selections or help with the direction of their breeding programme please don't hesitate to contact Matt Tonissen or our independent sheep breeding consultant Sandy MacKirdy. Sandy has over 50 years experience in sheep breeding consultancy and would be more than happy to help in this area. He can be contacted on 03 5572 3553.

## **INSPECTION DAY**

Monday 5<sup>th</sup> October 2009

11am – 4pm

If you would like to view the rams prior to the sale please take the opportunity to attend our pre sale inspection day. Rams will be clearly identified with lot numbers and able to be walked around in a relaxed environment. Rams can be inspected at any other time by appointment.

## **LAMB 2020 INDEX (Poll Dorsets)**

Lamb 2020 is a new index introduced by Lambplan to select sires to produce sucker lambs straight off mum and may well be suited to Southern production systems as it contains some emphasis on worm resistance. There is also less emphasis on leanness with fat levels aimed at about -0.5 which aids in the lambs ability to finish. Lamb 2020 also selects for higher weaning weights and lower birth weights.

## **COOPWORTH INDEX CHANGES (Maternals)**

Those of you who are familiar with the Coopworth \$ Index will notice that this year the Indexes are lower than last year. Information gained through various trials and the CRC nucleus flocks etc, has prompted the management of Lambplan to alter the heritabilities of some of the traits that make up the Index. This has resulted in the Coopworth index on all animals in the Coopworth database being dropped, by between five and ten index points.

## **ASBV ABBREVIATIONS IN THE CATALOGUE**

<b>BWT</b>	birth weight
<b>WWT</b>	weaning weight (approx. 100 days of age)
<b>PWWT</b>	post weaning weight (approx. 225 days of age)
<b>YWT</b>	yearling weight (approx. 360 days of age)
<b>MWWT</b>	Milk. Milking ability of a rams daughters
<b>PFAT</b>	Post Weaning Fat Depth (approx. 225 days of age)
<b>PEMD</b>	Post Eye Muscle Depth (approx. 225 days of age)
<b>YGFW</b>	Yearling Greasy Fleece Weight (approx. 360 days of age)
<b>PFEC</b>	Post Weaning Faecal Egg Count (approx. 225 days of age)
<b>NLW</b>	Number of Lambs Weaned

(For full descriptions of these traits please see 'Understanding LAMBPLAN ASBV's at [www.sheepgenetics.com.au/information](http://www.sheepgenetics.com.au/information))

## ICON FLOCK HISTORY

The ICON Poll Dorset stud was founded in 2002 with the purchase of 18 stud ewes and 1 stud ram from the well renowned Windorah Poll Dorset stud at Swan Hill. Since then ewes have been purchased from Allendale Poll Dorset stud at Bordertown in SA and semen has been used from the best available sires both in Australia and New Zealand, including the famous Kurralea 5 star.

In more recent times we have used sires from the Tattykeel Stud at Oberon NSW. Although not big fans of showing sheep we felt that for a stud to dominate the showing the way they have the past few years, that they might have something to offer our stud. Deep bodied rams with big hindquarters have been carefully infused alongside high ranking Lamb plan benchmark sires, as well as the best of our home bred rams. This move has been a great success. We continue to search Australia and abroad for possible stud sires.

## BREEDING AIMS

- **BALANCED** EBV's and **STRUCTURAL** soundness
- Rapid early growth and **FINISHING ABILITY**
- **HIGH** muscle EBV's and **HINDQUARTER MUSCLING** to match
- Long **THICK BODIES** with clean faces
- Ease of lambing
- **TOLERANCE** to internal parasites
- **NOT** too lean

Lambplan figures are used in conjunction with stringent visual appraisal. At no stage do Lambplan EBV's override good sound breeding practices and structural conformation. At Icon we aim to produce fast growing, early maturing rams that at the end of the day put money back into our clients pockets.

It is our ongoing policy to use Artificial Insemination and Embryo Transfer to advance our genetic progress. ET has really given us some huge gains in recent years and these days many of our "elite" stud sheep are bred via this method.

## CHROME FLOCK HISTORY

A self replacing prime lamb seedstock flock was established by the Tonissen family in 2004. A driving passion to continue breeding stud sheep was realised after being involved in animal breeding from a very young age. Together with distinguished local sheep classer Sandy MacKirdy they have quickly established a stud flock of very competitive maternal genetics.

## COOPWORTHS

The Chrome Coopworth Stud was founded, with the purchase of 69 ewes from Clifton Hill in 2005. These ewes together with their 05 drop ewe lambs, have formed the basis of the stud. Maintaining a flock of pure Coopworths is considered essential at this stage so that the traits which have seen the popularity of the breed increase over recent years are not lost to the industry.

Some key attributes are their black feet, hardiness, maternal superiority and doing ability under tough conditions.

## MATERNAL COMPOSITES

The 200 maternal composite foundation stud ewes are the top 10% of a 2000 ewe commercial flock already being run at Chrome. They were individually selected for type and fertility with the majority of the ewes having twins every year. They have been sired by high index Coopworth and Coopworth Composite rams. The maternal composite stud was established for a number of reasons including some of the following points:

- Improved growth rates
- Relatively free breeding cycle suitable for producers who wish to lamb early
- Tighter skins
- Improved milking ability
- Hybrid vigour

Both the Coopworths and the Maternal Composite ewes are run together so we have a direct comparison between the two. Stud ewe numbers now total more than 500 mature ewes plus 200 joined ewe lambs, which allows us to take a ruthless approach to culling in order to achieve our breeding objectives.

## BREEDING AIMS

- **STRUCTURALLY CORRECT** with good sound feet, legs and pasterns.
- **TOUGH** and **HARDY** suitable for a wide range of climatic conditions.
- **MAXIMIZE GENETIC GAIN** through stringent visual selection aided by recording on Lambplan.
- **HIGH FERTILITY** ewes able to rear multiples to marketable weights.
- **GOOD MOTHERING ABILITY** - all ewes are scored for their mothering ability when the lambs are tagged at birth.
- **FOOTROT TOLERANT** by using DNA analysis to identify superior sires.
- **DAG FREE** - sheep are challenged on farm and daggy sheep culled.
- **TO BREED A TYPE** every stud ewe is individually assigned to a sire at classing to maintain a type.
- **WORM RESISTANT** working towards a "no drench" flock at least for ewes over 2 yo using WEC ebvs as well as "challenging" and DNA analysis.
- **MAXIMUM KILOS** of lambs weaned per kilo of ewe mated.
